Serene Scents

"Light Up Your World, One Scent at a Time"

In recent years, home-based scented candle-making has gained popularity as a creative and profitable business. With growing demand for unique, handcrafted products, scented candles are no longer just a source of light—they are lifestyle products that enhance ambiance, promote relaxation, and add a personal touch to homes.

A home-based scented candle business is a low-investment venture that offers flexibility, creative freedom, and high-profit potential. With minimal space requirements and easily accessible raw materials like wax, wicks, fragrance oils, and containers, anyone with a passion for crafting can start this business.

Welcome to **Serene Scents**, where we bring warmth, elegance, and delightful fragrances into your space! Born out of passion and creativity, our home-based candle business focuses on crafting **hand-poured, eco-friendly scented candles** that add a touch of magic to any room.

Each candle is carefully made with high-quality **natural wax, premium fragrance oils, and lead-free cotton wicks**, ensuring a clean burn and a lasting aroma. Our goal is to create not just candles but experiences—whether it's a calming lavender candle for relaxation or a citrusy blend to energize your day.

We believe in **sustainability and personalization**. From minimalist jars to beautifully packaged gifts, our candles are perfect for self-indulgence or as thoughtful presents for your loved ones.

1. **Cost Estimation for Raw Materials**
   a) Cost of 1 kg Soy/Paraffin Wax = Rs. 140-320 => Average Cost = Rs. 230/kg
   b) Cheapest Eco-Friendly Wicks = Rs.50 for a pack of 50 Wicks
   c) Cost of 1 kg Fragrance Oil = Rs. 2640-4300 => Average Cost = Rs. 3000/kg
   d) Cost of 1 kg Dye = Rs. 6000-12000 => Average Cost = Rs. 9000 (based on brand and colors)
   e) Cost of Containers = Rs. 20/piece in wholesale
   f) Cost of Labels and Packaging = Rs. 14/set in wholesale
   g) Cost of Miscellaneous Items = Cost as per market standards

   Adding up all the costs of raw materials as per our requirements (measurements shown in the table) = Rs. 5750

i) Market survey and study

2. **Cost Estimation for Labour Cost**
   a) Average cost if self-made = 0 (as only time is invested)
   b) Average cost of hired help = Rs. 75-125/hour => Rs. 100/hour (Since we need semi-skilled labour who are well conversant in scent blending, wick placement, and quality control)

Adding up all the costs of labour as per our requirements (measurements shown in the table) = Rs. 500

Sources – Market Survey and Questioning

3. **Cost Estimation for Overhead Capital**
   a) Cost of Electricity for Melting Wax and Equipment = Rs. 1000-5000/month => Average Cost = Rs. 100/day
   b) Cost of LPG for Wax Melting = Rs. 800-2500/month => Average Cost per day = Rs. 55/day
   c) Rental Charges = Rs. 0-5000/month (since it is a home-based setup) => Average Cost per month = Rs. 2500 => Average Cost per day = Rs. 83.3/day => Rounded off to nearest zero, Rs. 80/day

Adding up all the costs of overhead capital as per our requirements (measurements shown in the table) = Rs. 235

Sources – Govt. charges for LPG and Electricity and Basic Estimation

4. **Total Production Cost**
   Cost of Raw Materials + Labour Cost + Overhead Capital Cost = Rs. 5750 + 500 + 235 = Rs. 6485

So, production cost for each candle = Rs. 6485/50 = Rs. 129.7/candle

5. **Pricing Strategy**

   Selling price for each candle is calculated at 1.5x profit of production cost = Rs. 194.55/candle => Rounded off to nearest 5, Rs. 195/candle

   Revenue earned = Selling Price x 50 = Rs. 9750

   Profit earned = Total Revenue – Total Cost = Rs. 9750 – 6485 = Rs. 3265

6. **Break-Even Analysis**

   Break Even Point – Total Raw Materials' Cost/Selling Price per Candle = 5750/195 = 29.48, i.e. 30 candles approximately.

   Selling at least 30 candles ensures covering all costs, and selling all 50 candles results in a profit of ₹3265.

Thank you for supporting a small business with big dreams. Light a candle, breathe in the fragrance, and let us illuminate your moments with love and light.
